## 2. Output Program

```
1 import 'package:dart_basic1/dart_basic1.dart' as dart_basic1;
2
3 void main(List<String> arguments) {
4   print("Hello world!");
5
6 }
```

```
PS D:\polinema_sem_4\pemrograman_mobile\week1\src\dart_basic1> dart run
Building package executable...
Built dart_basic1:dart_basic1.
Hello world
```

```
1 import 'package:dart_basic1/dart_basic1.dart' as dart_basic1;
2
3 void main(List<String> arguments) {
4   print("Hello world!");
5
6   print('Luas Segitiga: ${dart_basic1.hitungLuasSegitiga()}');
7 }
```
